Dr. Hendrick is as well educated, as well read in medicine, as well prepared for his profes-sion, has as good success, and has as good la sion, has as good success, and has as good la practice, as any other physician in the county. No other is more widely or more generally ac-cepted. Nor is there any other who is better to be depended upon in the worst and most difficult cases. He is the quickest and surest in breaking up a fever. He is the sarrest, for he neither kills nor injures any by over-dosing them, and he has saved a large number whom other physicians were losing. He is the whom other physicians were losing. He is the best mid-wife. He is also the best in the treatment of female complaints, liver, lung, and kidney diseases, and piles. There are numerous incidents on every hand which stand as incontrovertible facts. And when you call upon him you do not have to pay 50c. or more for a prescription and then go to a drug store and buy your medicine. You can save the price of the prescription every time and get what will answer the purpose better.
It is not necessary that you should pay so much for a small piece of paper with something written on it that was probably taken from a book. The most ridiculous thing in medicing is a roung practitioner asking such medicine is a young practitioner asking such prices simply for a prescription for older men's brains. You want to get your medicines of one who keeps his own medicines on hand and who knows by actual test what they are, then you obtain them at better rates, and can with more certainty depend upon them. You always find Dr. Hendrick fully prepared and ready for what is proceed. what is needed.

Prepared by an entirely NEW METHOD. Composed of the PUREST MATERIALS. WILL NOT INJURE THE FABRIC. WILL CLEANSE WITHOUT RUBBING.

You can do a large washing without any rubbing; use the boiling process instead. You can save Time, Labor, Fuel, Soap and Clothing.

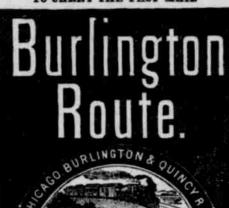

DIRECTIONS FOR USE.

Cut up fine and dissolve one half bar in half gallon of hot water. Pour half this dissolved soap into a tub with just sufficient hot water to cover a boiler full of clothes. Then put the clothes in to soak, rubbing plenty of scup in the most soiled parts. Be sure that the soaking water is hot; soak the clothes half an hour; stir them occasionally so that they may get the full benefit of the hot suds; pour the remainder of the dissolved soap into the boiler, adding sufficient water to cover the clothes; wring them lightly out of the suds. Soap the stail next spots and place loosely in the boiler; boil to to 20 minutes, rinse well, blue and hang to dry.

Do not crowd the boiler too full. The same boiling water may be used for further boiling by adding a little soap to each boiler-full of clothes. Fannels and prints should not be boiled, only a little rubbing required after soaking. This soap will cleanse clothing a thoroughly as any other without the use of the boiler. We prefer and recommend the boiler process as in itself a cleansing process, saving labor, the wear of the wash-board, and being a best disinfectent known, it is easier to boil the dirt out than to allow best disinfectent known, it is easier to boil the dirt out than to allow best disinfectent known, it is easier to boil the dirt out than to allow best disinfectent known, it is easier to boil the dirt out than to allow best disinfectent known, it is easier to boil the dirt out than to allow best disinfectent known, it is easier to boil the dirt out than to allow best disinfectent known, it is easier to boil the dirt out than to allow best disinfectent known, it is easier to boil the dirt out than to allow best disinfectent known, it is easier to boil the dirt out than to allow best disinfectent known, it is easier to boil the dirt out than to allow best disinfectent known, it is easier to boil the dirt out than to allow best disinfectent known, it is easier to boil the dirt out than to allow best distinctions.
